

ROCK INOVEC

The area of 0.44 m² consists of 17 different pieces, the appearance of which is designed to form a complete pattern of loose stones. For this reason, it is very important to follow the instructions for tiling. The tiles are packed in a box measuring 60x19.5x18 cm. The package contains 17 different stones with an area of 0.44 m².

For easier composition of the cladding, the stones in each box are lined in 4 units, which are marked with Roman numerals I, II, III, IV and are separated by cardboard plate.

It is important that you pick up the tiles from the box according to these units. Then you will get 4 units, which in a row form a complete series. **The height of the row is 17 to 17.5 cm.**

To avoid visible repetition of the pattern, the next row starts with another series. If you have started the first row by I. For next row (under or above previous), you can start with III. For example.

Examples of patterns :

I.	II.	III.	IV.	I.	II.	III.	IV.	I.	II.	III.	IV.	
III.	IV.	I.	II.	III.	IV.	I.	II.	III.	IV.	I.	II.	III.
II.	III.	IV.	I.	II.	III.	IV.	I.	II.	III.	IV.	I.	
IV.	I.	II.	III.	IV.	I.	II.	III.	IV.	I.	II.	III.	IV.
III.	IV.	I.	II.	III.	IV.	I.	II.	III.	IV.	I.	II.	

NOTE: Due to the exact imitation of split and drawn stone, our production should be seen as a handicraft and each product as an original, the dimensions of which also have a certain tolerance.
